---

Miller Electric,

We installed the 22KW generator at 750 Buffalo Run Rd. Bellefonte, PA 16823, on 11/29/2017. The generator is providing standby emergency power to the entire 200-amp Panel.

We have performed service/maintenance on the generator every year in November. We can continue this service with the next owner. The generator warranty has timed out, but it is still in good working order. Yearly service is recommended to extend the life of the generator.

Thank you,

Miller Electric
